EDUCATION

SR Group of Institutions, Jhansi, UP <i>Bachelor of Technology - Computer Science and Engineering</i>	Aug. 2019 – July 2023 CGPA: 8.88
Jugal Devi Saraswati Vidya Mandir, Kanpur <i>12Th Std.</i>	Apr. 2017 – June 2018 Per: 84.67
Maharishi Vidya Mandir, Hamirpur, UP <i>10Th Std.</i>	Apr. 2015 – May 2016 CGPA: 9.0

EXPERIENCE

Software Developer <i>Nippon Data System Ltd.</i> - Developed web applications using Laravel and CodeIgniter frameworks to deliver clean and maintainable code. - Leveraged the MVC architecture to build robust back-end solutions. - Built server-side applications using Node.js, ensuring fast performance and scalability. - Developed middleware and custom logic with Express.js for dynamic web applications. Technologies and Tools Used: Laravel, CodeIgniter, Node.js, Express.js, Php Version Control: Git, Github	Aug 2024 – Present <i>Noida, UP, India</i>
Node.js Developer Intern <i>Ricoz</i> - Makes an APIs and handles server side functionality. - Prioritized and organized tasks to efficiently accomplish service goals. - Participated in team meetings and provided input on deadlines, designs and enhancements. - Assessed code during testing stage to determine potential glitches and bugs. Technologies and Tools Used: JavaScript, Node.js Version Control: Git	Dec 2023 – July 2024 <i>Remote, India</i>
Lab Programmer – Python Expert <i>Eshan College of Engineering</i> - Integrated laboratory equipment with computer systems for enhanced performance. - Implemented and tested enhancement feature requests to improve product functionality and extend performance. - Created instruction manuals for most-used software and computer programs to achieve easily accessible programming. - Developed and implemented software programs to meet laboratory requirements. Technologies – Python, Web Development	Aug 2023 – June 2024 <i>Mathura, UP, India</i>

PROJECTS

EPR for End-of-life Vehicles Python, Django, mySql, JavaScript, Bootstrap - Developing a comprehensive web-based portal for Extended Producer Responsibility (EPR) compliance for End-of-Life Vehicles (ELVs) using Django and MySQL. - Designed and implemented multi-step registration workflows for Producers, RVSFs (Registered Vehicle Scrapping Facilities), and Bulk Consumers, with role-based access control. - Created dynamic Django models and forms to capture complex entity details such as GST information, PAN, contact details, and authorization documents. - Added validation checks for uploaded documents and form fields to maintain data integrity and ensure compliance.	
REMPFENCE Portal for Finance Django, Python, mySql, - Developed a secure internal web application for automating fund allocation, utilization tracking, and financial reporting using Django. - Created dynamic forms for entering and updating fund data such as budgets, expenses, carry-forwards, and allocations. - Designed dashboards for visualizing fund flow using progress bars, tables, and summary cards. - Ensured data accuracy and consistency with server-side validations and constraints at the model and database level.	
Moefcc Legal Recruitment Portal Php, CodeIgnitor, MySQL, Bootstrap - Designed and developed a secure recruitment portal for the Ministry of Environment, Forest and Climate Change (MoEFCC) to manage legal expert hiring processes. - Built candidate registration and login modules with secure authentication, input validation, and session management. - Enabled document uploads (CVs, degree certificates, ID proofs) with secure file handling and format validation. - Added role-based access for Admins, Reviewers, and Applicants to streamline the recruitment workflow.	
Driver Drowsiness Detection and alert System Python, OpenCv, Facial Landmark Detection - Developed a robust algorithm to accurately detect and track facial landmarks, particularly focusing on the eyes. - Calculated the Eye Aspect Ratio EAR to quantify eye openness and detect signs of drowsiness. - Integrated real-time video capture and processing to enable continuous monitoring of the driver's condition. - Implemented an audible alarm system to alert the driver and enhancing safety during driving.	
Weather App Node.js, Express.js, Rest API, Postman - Developed a weather app using Node.js, Express.js, and the OpenWeatherMap API to provide real- time data. - Implemented a RESTful API endpoint to fetch weather information for a specific city, utilizing asynchronous programming and the Axios library for HTTP requests. - The project showcased proficiency in server-side JavaScript, API integration, and handling external dependencies.	

TECHNICAL AND NON-TECHNICAL SKILLS

Languages: Python, JavaScript, C/C++, HTML, CSS, MySQL
Technologies and Frameworks: Laravel, CodeIgniter, Node.js, Express.js, Bootstrap, CSS, MaterialUI, JQuery
Databases: MongoDB, MySQL
Developer Tools: Git, VS Code, Visual Studio, Postman, PyCharm, mysql workbench
Soft-Skills: An ability to work as a team, communicate effectively, learn from mistakes and manage time effectively

ACHIEVEMENTS

- I have solved 200+ Questions on Leetcode and achieve gold badge in Hackerrank.
- Got Specialization in Python Programming from Michigan University.
- **International Patent : “AI Based Geo Water Analyzer”** UK Design International Design Classification: Version: 14 2023 Class: 10 CLOCKS AND WATCHES AND OTHER MEASURING INSTRUMENTS, CHECKING AND SIGNALLING INSTRUMENTS Subclass: 05 INSTRUMENTS, APPARATUS AND DEVICES FOR CHECKING, SECURITY OR TESTING Design number: **6365596** Grant date: 20 May 2024 Registration date: 13 May 2024
- Published a research paper on **“A Study on Current Technologies of Microprocessor and Microcontroller”** in International Journal of Innovative Research in Science, Engineering and Technology (IJIRSET)—Volume 10, Issue 5.
- Published a research paper on **“Design an Optimal Shape Binary Search Tree using C-language”** in International Journal of Innovative Research in Computer and Communication Engineering (IJRCCE)—Volume 8, Issue 12.
