

Complete Login Process after Setup

- a. Open FireFox Private Window and login to (<https://saccess.nic.in/>)

The screenshot shows the NIC WEBVPN Sign-in page. On the left, under the heading "NIC WEBVPN", there is descriptive text about the service and a link to download the HySecure Client. On the right, under the heading "Sign-in", there are two input fields: "Complete Email Address" with the value "eofficeadmin.cpcb@supportgov.in" and "Password" with masked characters. A dark grey "Sign-in" button is located below the password field. Three red arrows are drawn on the page: one pointing to the email address field, one pointing to the password field, and one pointing to the "Sign-in" button.

NIC WEBVPN

NIC WebVPN service provides user friendly and secure access to internal applications over public network.

Users can access internal web applications hosted in NIC Data Centers over any internet connected device using a web browser.

Please contact your respective NIC coordinator for details regarding accounts and access.

Unauthorized access is prohibited. All access is logged on NIC WebVPN.

 [Click here to download HySecure Client.](#)
